TALENTI ARCHITECTURE VIEWS

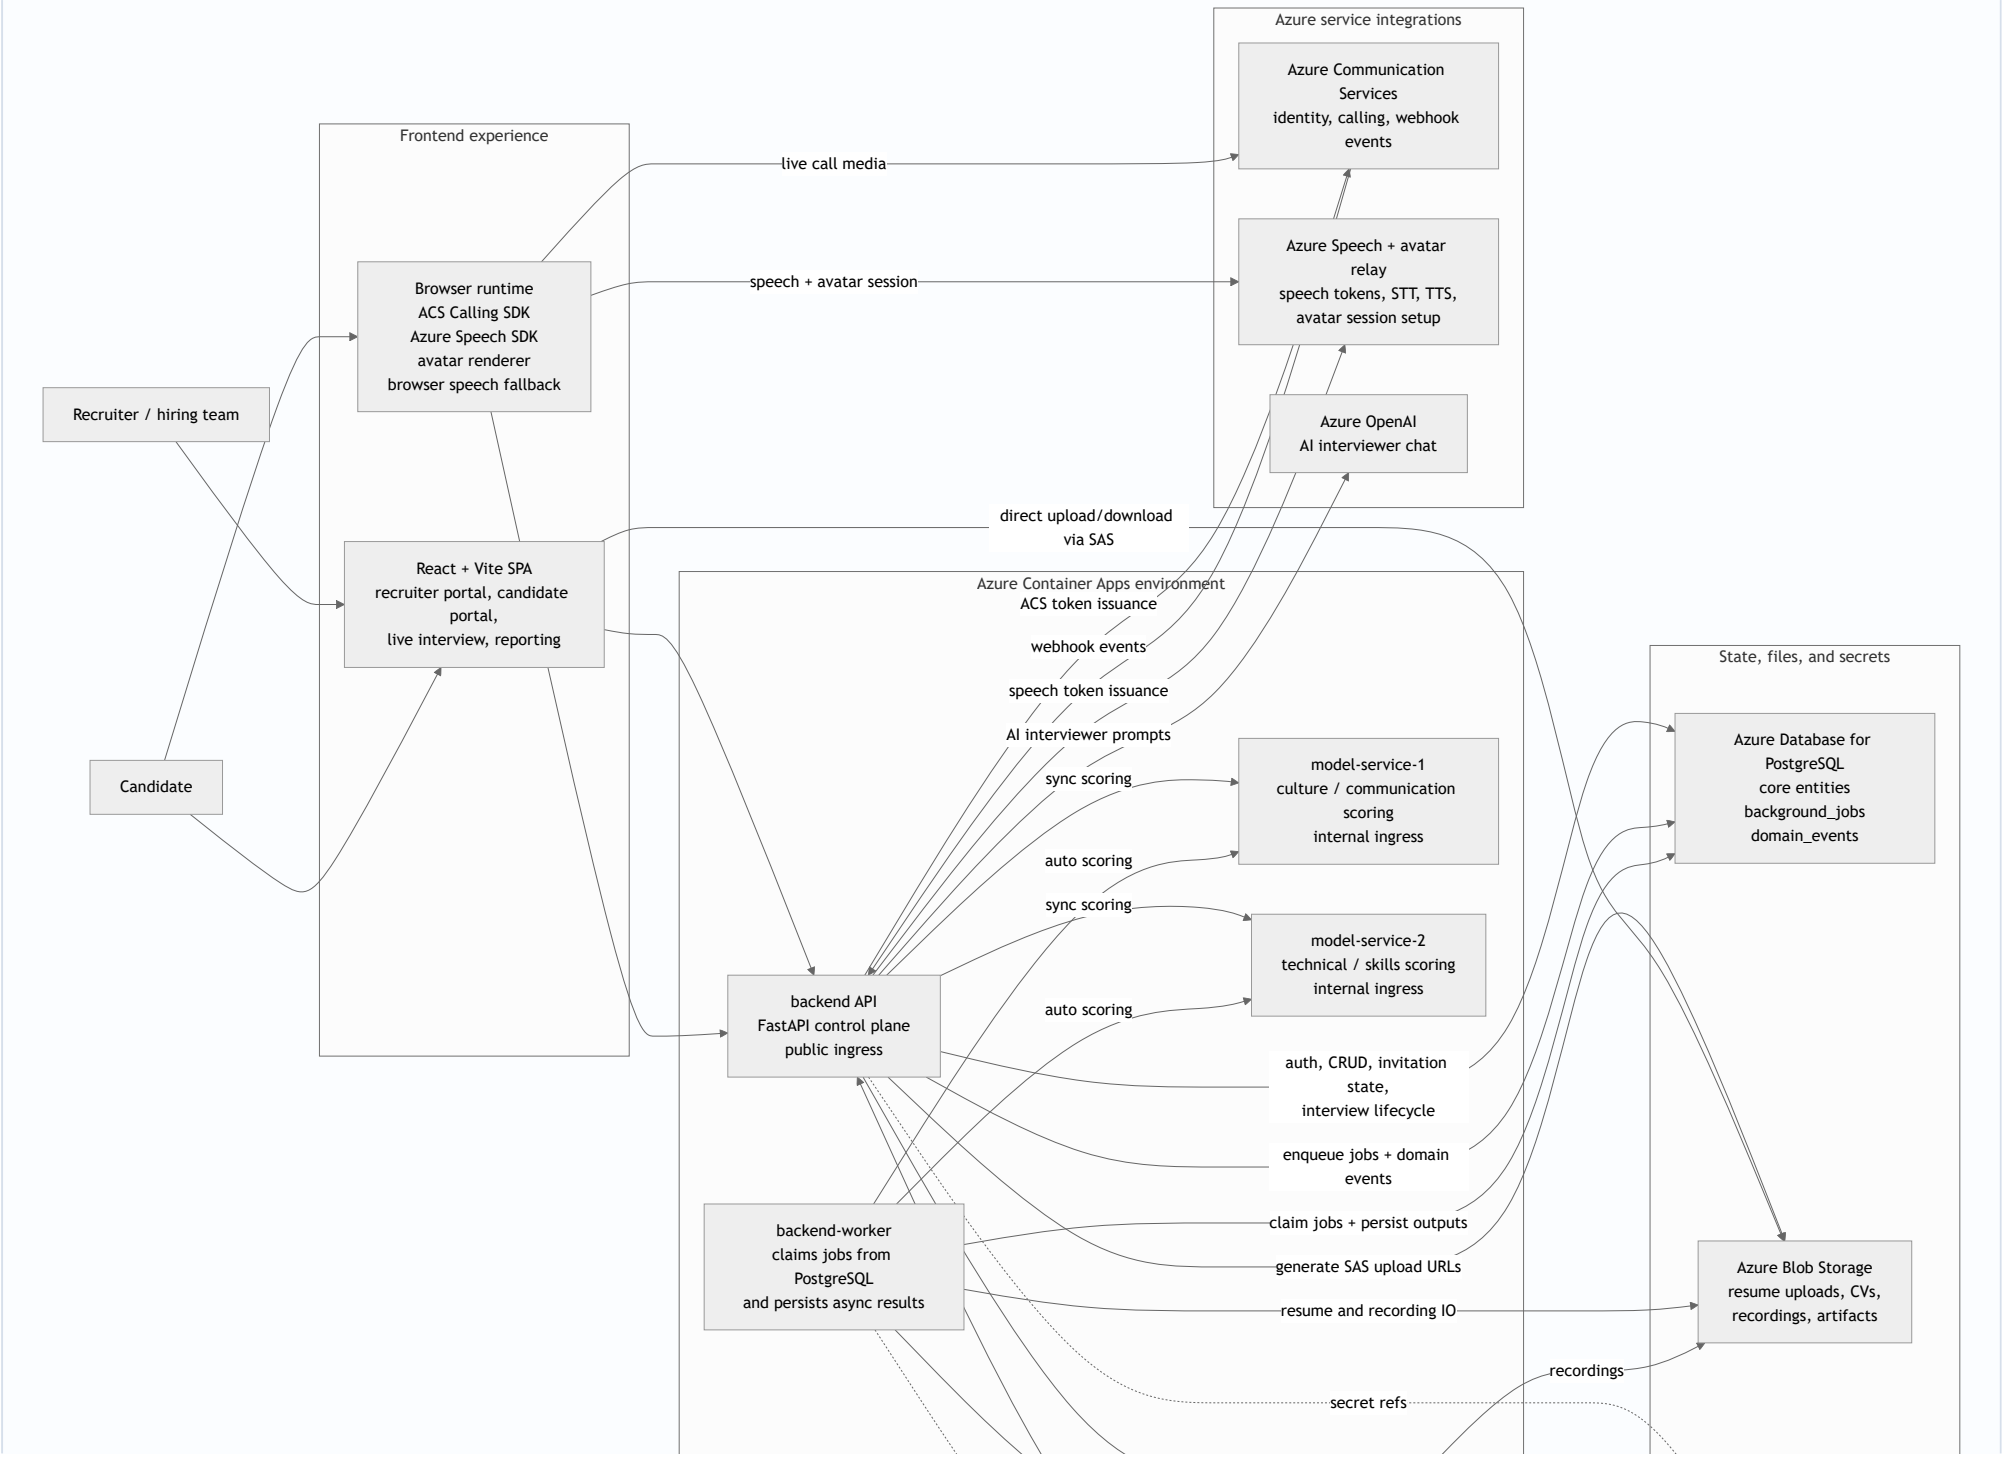
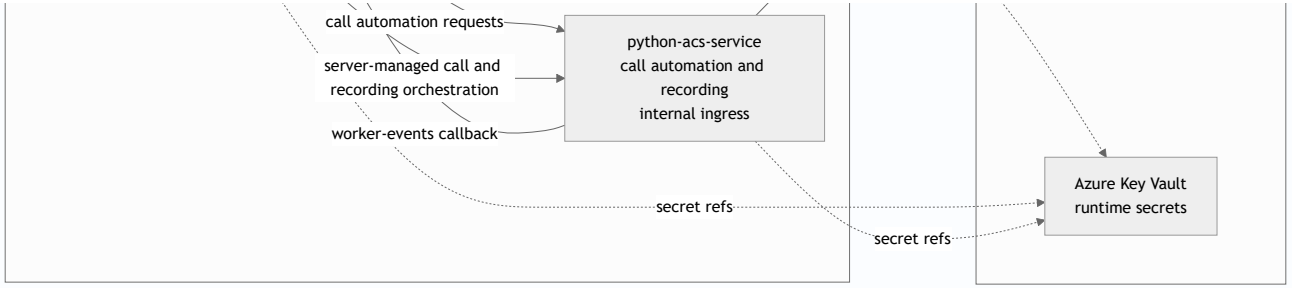
2. Runtime Topology



Azure service integrations
Azure Communication Services
identity, calling, webhook events
Frontend experience
live call media
Azure Speech + avatar relay
speech tokens, STT, TTS, avatar session setup
Browser runtime
ACS Calling SDK
Azure Speech SDK
avatar renderer
browser speech fallback
speech + avatar session
Recruiter / hiring team
Azure OpenAI
AI interviewer chat
direct upload/download via SAS
React + Vite SPA
recruiter portal, candidate portal,
live interview, reporting
Azure Container Apps environment
ACS token issuance
webhook events
speech token issuance
AI interviewer prompts
State, files, and secrets
Azure Database for PostgreSQL
core entities
background_jobs
domain_events
Candidate
sync scoring
model-service-1
culture / communication scoring
internal ingress
auto scoring
sync scoring
model-service-2
technical / skills scoring
internal ingress
auto scoring
backend API
FastAPI control plane
public ingress
auth, CRUD, invitation state,
interview lifecycle
enqueue jobs + domain events
claim jobs + persist outputs
generate SAS upload URLs
backend-worker
claims jobs from PostgreSQL
and persists async results
resume and recording IO
Azure Blob Storage
resume uploads, CVs, recordings, artifacts
recordings
secret refs



call automation requests
server-managed call and recording orchestration
worker-events callback
python-acs-service
call automation and recording
internal ingress
secret refs
secret refs
Azure Key Vault
runtime secrets
